gigabeat
music sounds better in colour

video player

- + gigabeat's advanced 3.5" screen gives you an exceptional viewing experience.
- + Store up to 127* hours of video – that's around 60 feature films.
- + Up to 8* hours of continuous video playback on a single charge.
- + Output your video to a large screen using the bundled cable.
- + Download digital music and video from BigPond Music, Channel Go, RipIT.com, Sanity and more.
- + Features PlaysForSure™ Video. This makes it easy to find digital media files that will play first go.
- + Transfer video easily from Notebook or PC to gigabeat via Windows® Media Player™.

jukebox

- + Store up to 7500 songs – almost 500* hours of music.
- + Play audio for up to 30* hours on a single charge.
- + 7 equaliser modes, including rock, hip hop, jazz and more.
- + Crank up the volume - connect gigabeat to a stereo via the bundled AV cable.
- + Transfer tracks quickly from a Notebook or PC to gigabeat via Windows Media Player.
- + Optimise audio quality using Toshiba Harmonics software.
- + PlaysForSure Audio™ helps you find compatible music files.
- + Stream audio to Xbox 360 while you play.

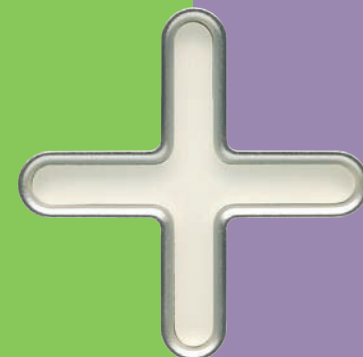

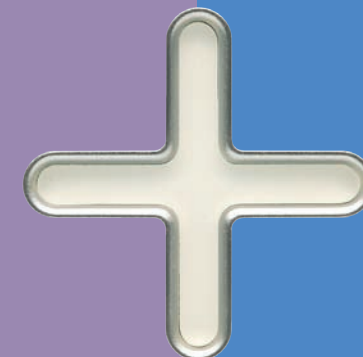

photo album

- + Download or backup photos direct from your digital camera (cable provided).
- + View photos direct from your digital camera - no PC required.
- + Create multiple photo albums to showcase your memories.
- + Create impressive slide shows. Set them to music and share them on screen or output them to an external screen.
- + Manage your images quickly and easily with the Windows® Media Player™ interface.
- + Stream photos to your Xbox.

more

- + Unique 'battery off' switch isolates your battery to extend life between re-charges.
- + Native Windows® Media Viewer™ support means files created on a Notebook or PC will be compatible with gigabeat.
- + Windows® Media Player™ Room software helps you store, synch and play music, videos, pictures and recorded TV – all from one place.
- + gigabeat can double as a backup device and store up to 80,000 individual files.
- + No-nonsense swap out warranty – if something goes wrong, we'll swap your gigabeat for another.

gigabeat V series

Hold your
world in the palm
of your hand.

gigabeat V is the first in a new class of portable media centres – an all-in-one device that lets you take vast volumes of music, videos, photos and files wherever you go: up to 127* hours of video or over 500 hours of audio.

Better still, gigabeat V features a large and bright 3.5" screen that gives you high quality video with vivid colour. And it features a battery that delivers up to 8* hours video playback or 30* hours audio on a single charge.

gigabeat V - it's a home away from home entertainment system that fits in a pocket and lets you play and play and play.

+ GIGABEAT V. IT'S EASY TO FIND YOUR WAY AROUND.

- gigabeat V features a streamlined and intuitive interface that makes it very easy to use.
- Launch the Portable Media Center Edition software with a single click on the Windows button.
- Navigate through the menus by toggling left, right, up or down on the thumb-operated joystick.
- Return to higher level menus with a quick click on the Back button.

TOSHIBA

A WARRANTY SO GOOD YOU WOULDN'T SWAP IT FOR ANYTHING.

gigabeat comes with a no-nonsense 'swap out' warranty. This means that if your gigabeat experiences a problem, you can take it to any Toshiba MobileCare centre for an immediate swap - no waiting.

Alternatively, if you're particularly attached to your gigabeat, you can choose to have it repaired (within warranty guidelines).

+ THE SCREEN FEATURES SOME VERY BRIGHT IDEAS.

gigabeat features a new screen technology based on Organic Light Emitting Diodes. Unlike conventional LCD displays, OLED screens do not need a backlight as the individual pixels generate their own light. This reduces the amount of power they consume, and allows them to be thinner and lighter. In addition, colours are more vivid and OLED screens offer the high-speed refresh rate essential for video. Plus the 3.5" screen is large enough for a serious viewing experience, with the colour and detail you'd expect from a high-end entertainment system.

+ A BATTERY THAT CAN DO A FULL DAY'S WORK.

gigabeat V features a high capacity, rechargeable Li-ion battery. It can deliver up to 8* hours of continuous video on a single charge, or up to 30* hours of audio*. Better still, it takes only 3* hours to fully re-charge.

+ THE HARD DISK DRIVE THAT MAKES IT ALL POSSIBLE.

Toshiba is the world leader in developing ever smaller and more advanced hard disk drives. gigabeat features Toshiba's world-renowned 1.8" hard disk drive. This highly reliable, shock resistant device has a 30GB capacity - enough to store hundreds of hours' worth of entertainment and thousands of images, and still have room for more.

*Battery life and number of charge cycles will vary depending on use and settings.
Rechargeable battery has a limited service.

+ GIGABEAT'S SOFT AND FRIENDLY SIDE.

It's the software that helps make the gigabeat V so versatile, powerful and easy to use. gigabeat is completely compatible with Windows-based software like Microsoft's Windows XP Media Center Edition. This means you can take advantage of the power of these applications to create files that will then play seamlessly on your gigabeat. In addition, other clever software improves sound quality, simplifies the management of all your digital material and makes it easy to buy or rent compatible music or video.

hardware + software

+ GIGABEAT FEATURES MICROSOFT'S PORTABLE MEDIA CENTRE EDITION (PMC).

gigabeat's array of entertainment options can all be accessed and controlled with Microsoft's friendly Portable Media Center software. This makes it easy to use and navigate, and helps utilise the power of the hard drive to scroll quickly through large media libraries and find what you're looking for.

gigabeat will also synchronise particularly well with PCs running Microsoft Windows XP Media Center Edition, software which accounts for more than 30 percent of PC sales today. You can even set up automated synch rules to transfer just your favourite songs, most played songs, least played songs, new songs or many other options.

+ PLAYSFORSURE™ MAKES IT EASY TO FIND FILES THAT ARE SURE TO PLAY.

If you're shopping for music or video and you want to make sure it will play without problems, look for the PlaysForSure™ logo. When you visit leading online stores and see the logo you'll know what you buy will play perfectly on your gigabeat. Many of the best digital music and video stores offer PlaysForSure™, including BigPond Music, Channel Go, RipIT.com, Sanity and many more. Visit <http://www.microsoft.com/windows/windowsmedia/playsforsure/default.aspx> for more information.

+ ANOTHER HIGHLIGHT - THE HIGH NOTES.

Gigabeat includes software that helps to compensate for the loss of high frequencies when files are compressed into WMA or MP3 format. This means that music played on your gigabeat retains more of the qualities of the original recording. Sound good?

+ NATIVE WINDOWS MEDIA VIEWER SUPPORT.

WMV is a high quality Microsoft video format. Many video download/streaming sites now support this format as a default standard. This gives gigabeat owners access to large volumes of content.

+ WINDOWS MEDIA PLAYER ROOM SOFTWARE - YOU'LL NEVER NEED TO LEAVE THE ROOM.

Install Windows Media Player from the bundled CR-ROM and you'll have a single fast, powerful program that will help you store and manage all your music, video, photos and recorded TV - all from one place.

+ WATCH RECORDED TV ON YOUR GIGABEAT.

If you have Windows Media Centre Edition on your Notebook or PC you can record any number of programs and then transfer the files to your gigabeat and watch them later*.

* Naturally, this is subject to any applicable copyright laws.

ON THE OTHER HAND. GIGABEAT S.

Looking for a smaller portable media centre? gigabeat S will slip neatly into a pocket - and yet you won't feel like you're leaving anything behind. It can function as a video player, jukebox, photo album, FM radio, storage device and more. It's another great all-rounder.
